SUMMARY

Backend Engineer with 3+ years of experience building **Java/Spring Boot microservices** and event-driven systems using **Kafka, Redis, and AWS**. Experienced with **Kubernetes/EKS**, REST APIs, CI/CD, and distributed systems; currently exploring **GenAI, Spring AI, Claude, Amazon Bedrock, and RAG**.

TECHNICAL SKILLS

Languages	Java, Python, C++, JavaScript
Backend	Spring Boot, Spring Cloud, REST APIs, Microservices, Spring Security, JWT
Distributed Systems	Apache Kafka, Redis, Event-Driven Architecture
Cloud & DevOps	AWS (S3, Lambda, SQS, DynamoDB, EKS, Bedrock), Docker, Kubernetes, Jenkins, JFrog
Databases	PostgreSQL, MySQL, DynamoDB
AI / GenAI	Spring AI, Claude, Amazon Bedrock, RAG, AI Agents
Testing & Tools	JUnit, Mockito, Git, GitHub, Bitbucket, GitHub Copilot

EXPERIENCE

SUN LIFE GLOBAL SOLUTIONS

Aug 2023 – Present

Associate Analyst Development | Java Backend

Gurgaon

- Developed and maintained **Spring Boot microservices and REST APIs**, implementing JWT-based authentication and role-based authorization for enterprise applications.
- Built an asynchronous email-processing workflow using **AWS Lambda, SQS, and DynamoDB**, enabling event-driven processing and reliable message handling.
- Developed secure REST APIs for file upload, download, and metadata management with **Amazon S3** integration and access controls.
- Optimized PDF-to-multi-page-TIFF processing by migrating CPU-intensive document conversion from **AWS Lambda to a dedicated Spring Boot service**, improving control over compute-intensive workloads.
- Implemented **Spring AOP**-based logging and performance monitoring and maintained **Jenkins CI/CD** pipelines for automated build, testing, and deployment.
- Deployed and supported containerized backend services using **Docker, Kubernetes, and Amazon EKS** in production environments.

PROJECTS

AI INTERVIEW AGENT

Spring AI | Claude | Amazon Bedrock | RAG | React

- Building an AI-powered interview agent that generates role-specific questionnaires and conducts interactive, context-aware interviews using **Claude via Amazon Bedrock**.
- Developing a **custom agent workflow** that analyzes candidate responses and dynamically generates follow-up “why” and probing questions from conversation context.

INSURANCE TRACKER

Spring Boot | Kafka | Redis | PostgreSQL | Webhooks

- Built a real-time insurance claim tracking system using **Spring Boot, Kafka, Redis, and PostgreSQL**, with event-driven claim processing and live status updates.
- Implemented secure third-party webhook integrations with **HMAC signature verification, request validation, and idempotent event processing**.
- Designed asynchronous Kafka consumers to persist claim timelines and propagate real-time status updates, using **Redis** for low-latency claim state.

RATE LIMITER / NOTIFICATION SYSTEM

Spring Boot | Kafka | Redis | AWS

- Built a distributed notification system supporting asynchronous Email and SMS delivery with per-user and per-channel **rate limiting using Redis**.
- Designed Kafka-based event pipelines with **retry and dead-letter handling** for reliable asynchronous message processing and failure recovery.

ACHIEVEMENTS

- LeetCode**: Solved 800+ problems; ranked among the top 7% of users.
- Publication**: Authored “AI-Based Touchless Attendance System,” published in IEEE Xplore, 2023.
- Hackathon**: Flipkart Grid 4.0 Level 2; Sun Life GitHub Copilot Hackathon Winner.

EDUCATION

Graphic Era University, Dehradun

B.Tech. in Computer Science

2019–2023

CGPA: 9.13/10
